

## GRINDINGS TABLES

---

CLEAN, ERGONOMIC GRINDING WITH FILTERED, RECIRCULATED AIR, OPTIMUM LIGHTING AND AUTOMATIC FILTER CLEANING.

### TECHNICAL DESCRIPTION

MONTA grinding tables consist of robust galvanized steel plate constructions and they have efficient extraction devices. This prevents the air in the room from becoming contaminated and the view of the workpiece remains clear with integrated LED light units. Dust sticking to the surface can also be blown off automatically at set intervals using compressed air. In order to prevent injuries, all edges are rounded. The hydraulically height-adjustable grille creates the perfect ergonomic working conditions for high quantities and the best machining results.
