

CLEANING BOOTH

MANUAL OR AUTOMATIC CLEANING SOLUTION FOR LARGE COMPONENTS AND/OR SMALL QUANTITIES.

TECHNICAL DESCRIPTION

A cleaning cabinet is a cabinet in which you can manually or automatically pretreat large parts in particular.

Manual cleaning

The most important features of a manual cleaning cabinet are ergonomic design, suitable ventilation and appropriate lighting to ensure that your specialist cleaning personnel can achieve a consistent, flawless result.

Automatic cleaning

To make the whole process more economically appealing, it is possible to use cleaning robots or moving spray rings in these kinds of cabinets.
